DG5205
LED Flood Light

DESCRIPTION

– DG5205 series LED flood light is specially designed for outdoor lighting, a new type of environmental protection and energy saving product which meets the requirements of landscape lighting is optimized for the shortage of traditional light sources. This product uses CREE's high-power LED light source, with the thermal design of superconducting heat dissipation materials, advanced intelligent circuit management and leading optical design, the product has excellent performance in road lighting.
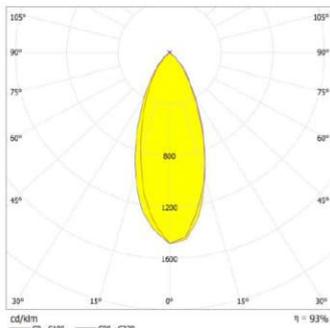

FEATURES

– Smooth line and LED structure features combine organically, the appearance, is simple and comfortable. The humanized structure concept design of the lamp.
– The shape of the lamp is simple and exquisite.
– Product modular design, effectively maintain the good cooling ,effect of light, and ensure the life of LED.
– IP Rating above IP65.
– Unique two time light distribution design, the light distribution curve present bat wing, illuminated the standard rectangle spot, guaranteed that the lamp distance can achieve the good uniformity in 40M.
– Long life power driver 5,0000 hours service life with short circurt protection, open circuit protection,thermal protection etc.with the LED lamp life.
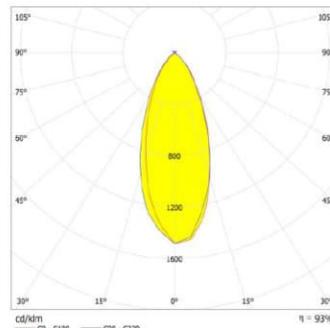

DATA

– Power Factor: >0.95
– CRI: Ra>75
– CCT: 2850-5300K
– Optional Light: 60/90
– Ambient Temperature: -30 --50℃
– Working Temperature: RH10%-90%
– IP Rating : IP65
– Mounting: Ceiling / side loading
– Lifetime: >50000h
