High-end Die-casting Aluminum LED Security Light

Features

- Smooth linear and LED structure features organically combined, the appearance is simple.
- P.I.R motion detectors functions, which realized the intellectualized design of product.
- The lamp adopts the 180 degree rotary structure, which can meet the needs of difference applications.
- Light source and electrical separate design, easy for installation and maintenance.
- Power supply, light source and mounting cover, the three divided and separate structure can be applied freely in various power and sizes.
- Professional optical design with efficient optical distribution, high efficiency, proving with variety of light distribution options.
- The lamp uses manual adjustment of color temperature, and rotary adjustment knob can achieve different lighting effects.
- Reasonable heat dissipation design to ensure the service life of lamps.
- Lighting structure, electrical safety compliance with EN60598 GB7000 standard requirements.
- Anti-electric shock protection: Class III
- IP rating: IP65
